## 4 STEPS TO NETWORKING AND JOB SEARCH SUCCESS

### Research

1

Get oriented fast. Search 653K+ employers, spot who's actually hiring, and dig into salary, growth, and open roles before you ever apply.

### Network

2

Reach the right people with 220M+ verified contacts. Your existing network shouldn't limit you.

### Connect

3

Turn a cold email into a warm introduction. Generate a tailored outreach message for any contact, pull in a saved job for context, and send – without the awkward first draft.

### Target

4

Search 10M+ jobs and surface hidden roles at companies that match your goals – posted or not. Go beyond the job board.
